Peer to Peer Computing
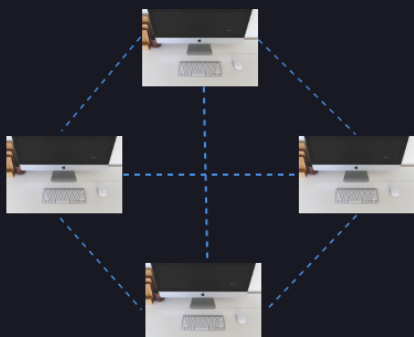

Peer to Peer (P2P) has the main function of facilitating the collaboration of diiferent users on the same network

There are 3 distinct methods of P2P functioning:

Multiple Peer Relationship

Distributed Peer Relationship

Collaborative Peer Relationship

Multiple Peer Relationship

When computers from the same network send data to the same server so that files can be shared and collected.

Distributed Peer Relationship

This is when computers combine their processing power to solve problems.

Collaborative Peer Relationship

When a small group of people who agree to help one another through a common interface.
